3

4 **ARCTICUS BLANCUS**

5 **ETHNIC BELIEVES AND INDIGENOUS LIFE.**

6

7

8 Prepared by the founder and president of the Eugenix P.S.A., a semi-indigenous member of the Arcticus
9 Blancus polar climatic ethnicity; aimed to protect Arcticus Blancus endanger minority and rest of the
10 Arctic and the Antarctic species facing uncertain future due to colonization, genocide and land wars.

11

12

13 **A. ETHNIC RELATIONSHIPS**

14

15 a. You should never get into romantic, intimate, sexual, reproductive relationships with
16 non arcticus blancus ethnicity.

17 b. Do not let yourself be drawn into hetero- ethnic relationships and do not draw any
18 foreign non-Arcticus Blancus ethnicity into such relationships.

19 c. Arcticus Blancus members especially woman, children must be kept away from evil
20 world, and our males and female's indigenous live reproductive cells must be guarded
21 from outside interference and non-indigenous access.

22 d. If your indigenous brother on the far side of the sea sends you a woman you send him
23 woman as well.

24 e. If your indigenous brother sends you his son to train you send him back with wifes and
25 sails.

26

27 **B. ETHNIC BUSINESS AND EMPLOYMENT**

28

- a. Do not conduct any business and do not support and efforts and do not serve in all foreign states and militaries, militias and defense organizations that do not recognize your ethnic territorial and martial reproductive rights.
- b. Know what the indigenous Arcticus Blancus have done to sustain them and continue as they to protect the marine life that provides fish and land life that provides wood for the boats and linum for the nets.

C. ETHNIC INNOVATION

Make your own machines from own or licensed technology from ethnic groups that support your ethnic values and finances. Protect your innovations using all legal and spiritual means as Arcticus Blancus due history of openness and non-protection is now endangered. United Nations A/RES/61/295. Declaration on the Rights of Indigenous Peoples.

D. ETHNIC PURCHASES

- a. No items that are considered “Luxury items” should be owned by ethnic member unless the item is of indigenous craft and represents important values of ethnicity.
- b. Ethnic members should not own a vehicle not suitable to member and family professional life activities. To exemplify: “If you're not a race driver you should not own Lamborghini, if you are not an agricultural or construction worker you should not own a truck”. Cars should be leased for duration and specialty vehicles should be rented for as long as they are needed regardless of if they are RV's, Yachts, Motorboats, Jet Skis, etc.
- c. You should not own or build home or take up land for you or your family bigger than your ability to maintain it as is required by maintenance standards.
- d. You should not play any hazardous games.
- e. You should not play any state lotteries above 100% tax deductible amount allowed based on your tax responsibility and only if for charitable cause.

E. INDIGENOUS ENVIRONMENTAL PROTECTION

61 Natural Indigenous life whenever possible is the only way to certain environmental sustainment. Humans
62 have developed a culture of colorful destruction with toxic and unrecyclable paints, plastics, and other
63 chemicals. The only way to keep our indigenous environment safe is maximal environmental protection
64 from all forms of modified natural substances. Arcticus Blancus ethnic persons and communities should
65 never let non-indigenous businesses into our market. We should decide what we buy, what others buy,
66 who produces and what is produced on our indigenous territory.

67

68 We must not forget that we are a living organism among millions of other mammals, fish, birds insects,
69 plants, and other forms of living intelligent organism and our role is to protect them and extend their life
70 so they also better understand why this planet mad their life so hard and violent. Our interference in the
71 natural resources and all forms of construction should be limited for the purpose of the sustainment of all
72 species abilities of continued life and their forms of philosophy and connections to natural earth and
73 extraterrestrial life. Other indigenous groups should be informed that they had overpopulated their kind,
74 destroyed many species, poisoned a lot of lands and waisted a lot of resources that were reserved to serve
75 the climate repair. What will God do with this problem?, I do not know.

76

77 F. ETHNIC INDIGENOUS DIETRY GUIDELINES

78

79 It is hard to fully determine a complete list of foods that can be consumed by the Arcticus Blancus
80 indigenous climatic ethnic groups, since Arcticus Blancus believes are based on the principle that all
81 animals are living creatures and due to distorted evolution some are vegetative creatures and some are
82 part of complex living food chain evenement-phenomen that should be studied in a protective to all
83 species manner until evolutionary species based living food chain dependencies are understood.

84

85 Since the humankind belongs to mammals it is believe of Arcticus Blancus that we should not consume
86 mammals as animals like us are intelligent as us and we should not make enemies of them, they can be
87 very useful and helpful for variety of crucial to human survival and exploration co-existent paths.
88 Examples of mammals that we should treat with outmost respect and including their individual climatic
89 variations and never eat: (Arctic animal races of white fur must never be mixed with other climatic
90 variations of same animals.)

91

92 a. Dairy animals,

93 b. Wool animals,
94 c. Transport animals,
95
96 Besides mammals, birds should not be eaten as well because birds are evolutionary right behind
97 mammals and although they are not common species that help humans as mammals do, their evolutionary
98 will to develop flight abilities is a source of never ending curiosity that can lead human kind to a great
99 sense and knowledge of their perspective.
100
101 Arctic Tern for example is a 100-gram bird that flies from the Arctic to Antarctic and back to Arctic
102 flying each year even 90,000 km according to internet sources. Bird's feathers are very warm so many
103 birds are used for feathers, however Arcticus Blancus believes that birds should not be plucked of their
104 feathers and consumed as food. Birds can be kept for feathers, but the feather collection should be
105 humane by collections of feathers that have fallen of the bird or picked from the nests as it is done with
106 the Icelandic goose feather collection.
107
108 a. Eggs are food for thieves so if you must steal because it was stolen from you eat the eggs but
109 not the yolk as it is source of blood.
110
111 The only non-plant-based food that is appropriate to indigenous Arcticus Blancus culture of life
112 connected with the polar climate and life by philosophical findings based on my perception of evolution
113 of predatory and non-predatory species are some of the Arctic and Antarctic fish that evolutionary-
114 anatomically more disconnected from the humans and other mammals. In search of deeper connection
115 with the world of living organisms, I had found that non-predatory fish should not be killed because they
116 are more connected with their water environment what makes them smaller non-predatory. On the other
117 hand, predatory fish have evolved to be larger creatures due to their lack of interest in their environment
118 or some change of their environment.
119
120 Some species of shark although it is a fish it gives birth like mammals so it is most likely more attached
121 to its offspring therefore such fish should not be eaten. In the future it is possible that Arcticus Blancus
122 will be plant based and consume edible marine algae in the future however for now as Arcticus Blancus
123 has fished in the Arctic and Baltic waters for thousands of years it can be considered lesser evil to fish

124 and self to consume fish that have light color flesh with low amount of blood, such as herring, pollock,
125 cod, etc.

126
127 Indigenous fishing practice should not involve hook fishing as Arcticus Blancus traditionally used nets
128 made of flux linen and it is humane way to catch the fish and release what we don't consume without
129 hurting the fish that we don't want to eat. Fish should be caught and store alive in net-bins that are water
130 free or water can be drained that will cause fish to set its mind as it would jump in to a land or ice surface
131 and by lost access to water and died free not died by killing fish by cutting.

132
133 Fish that we chose for consumption due to our own predatory-dietary life that is not yet perfect. Other
134 indigenous sea food choices such as clams and oysters are permittable under own recognizance, any
135 benefits and disadvantages should be shared with ethnic group.

136
137 Deep Sea creatures such as lobsters, crabs, crayfish, crawfish are not recommended, as they keep their
138 flesh protected by the shells (external vertebrates as I call them). Life of those deep-sea creatures seems
139 very disconnected from the traditional fish-fish food chain that in connection with traditional Arcticus
140 Blancus fish only diet places us away from the surface thought connected with other indigenous studies
141 of botany, climate, geology of the planet surface. There is a lot to study on the bottom of the sea floor,
142 however not a place to search for suitable food source for our indigenous sustainment.

143
144 **Short summary of the sea food guidelines:**

145
146 a. You can eat sea clams that have white flesh. But do not fall for their taste as they are
147 very feminine and bring you only daughter :).
148 b. From all the fish of the Arctic and Antarctic you can eat only the non-predatory fish
149 that do not give birth like mammals and its body flesh is of white low in blood color.

150
151 From the entire world of the plants know to be good for consumption it will always be best to start with
152 indigenous plants. Arctic nutritional botany is not as developed as the choices of other climatic ethnicities
153 of the Aquatic and Rafaltic regions, however it can be to our benefit that we have less choices. Fruit and
154 vegetable choices general remarks.

156 c. From all the indigenous plants of the Arctic territories consume green plants such as
157 spinach and from all the fruits options best will be native berries. All sweet fruits in
158 general besides citrus fruits should be always avoided. Green and yellow apples are
159 better than red apples.

160 d. All alcohol should always be avoided, unless a prescribed by a indigenous doctor for
161 stones, or heart issues and in those cases not alcoholic options should be consumed.

162 e. Lungs are for breathing and nose is for smelling. Smoking of cigarettes, and other
163 addictive substances is against indigenous believes in health protective approach to all
164 non-indigenous plant foods, spiritual and religious nonindigenous practices.

165

166 I believe that our kind has been co-chosen in the process of evolution to be the kind that looks over the
167 rest of the earths species and is here to determine whether the planet can be saved and life sustained. It's
168 not easy task that has been vested into us by the evolution but let's not abuse this gift and respect what we
169 have and try to find out what future holds for us and all the life on earth. Good Food Route. Follow,
170 Verify, Decide.

171

172 **G. ETHNIC RESPONSIBILITES**

173

174 a. Don't trust foreign forces no matter what is their origin and what they had promised
175 you. All colonists, industrialist, and governments are intended to organize
176 collaboration against your ethnic principals.

177 b. Never close eyes on the vulnerable members of Arcticus Blancus that were taken by
178 force against their will or were raised without the freedom that keeps your ethnicity
179 and indigenous understanding alive.

180

181 **H. INDIGENOUS LAND AND RESOURCES**

182

183 a. Indigenous Arcticus Blancus territory is not for sale. Our natural indigenous habitat is
184 our earthly home that we should protect from all forms of non-indigenous intrusion
185 from all kinds of evolutionary climatically non-indigenous species.

186

187 **I. REGARDING TILT OF THE PLANET AND EVOLUTION OF GENDERS.**

188

189 Tilt of earth 23.4° degrees shows an aggressive evolution of species that most likely has caused an early
190 evolution to develop 2 distant genders in predatory species that due to diverse climate differences make
191 longer evolving one gender mammal-like more sensible species impossible. Human species from the
192 early life were separated by various callings that caused not only sub climatic variations described in
193 Eugenix® Classification of Sub Climatic Tribes, but also by genders that make peaceful life extremely
194 difficult and near impossible here on earth. Humankind various climatic ethnicities abilities to cope with
195 disconnected senses of climatic organs on earth's difficult climate with corresponding predatory 2-gender
196 humankind is very difficult as all humans feel and experience.

197

198 In theory a planet with 0° axis tilt might be more desirable due to more connected geomagnetic
199 circulation with regular daily light source that might prevent a climate driven evolutionary issue that are
200 visible here on earth, however other factors are equally critical. Another option that might be desirable
201 specifically for the Arcticus Blancus indigenous group is a planet that has an axis tilt of $\sim 45^\circ$ making a
202 polar climate on planet so vast that number of evolved species is limited due to possibly more extreme
203 weather on magnetic poles, however those are all incomplete assumptions based on axis-tilt principle
204 alone, other factors such as the length of the sun orbit, sun-to-planet UV power, presence of water and
205 organic blocks are as much critical elements of larger evolutionary planet-forming principles and
206 equations.

207

208 J. REGARDING THE GOD.

209

210 God is an invisible force in the Cosmos that keeps on expanding what must be expanded and contracts
211 that must be contracted all according to rules of physics. God is however far more complex than physics
212 and math as it processes infinitely for the benefit of all and that part might make no sense to most
213 persons. On planet earth for example God's invisible force does several things it:

214

- 215 1. It serves as a protective force to all species in form of the
 - 216 a. Invisible magnetic shield, it protects all species by detraction of harmful rays.
 - 217 b. Invisible atmosphere, it allows species to communicate via sound.
 - 218 c. Invisible water, it allows chemicals to form organism in gravity-free-like space that
219 allows to move atoms around by use of weak forces of the atoms that in perfect

220 preplanned arrangement can form single cell organism that learn to swim and when are
221 ready are able to transition in to the land life as it was for some species, other might be
222 formed in the atmosphere alone and other just on land.

223 2. It serves a central nervous system of the planet's non-living organic and inorganic forms and
224 all living forms of life's, by moving data, elements of life and life forms like the magnetic
225 needle in the compass is visibly moved, but it's the invisible force that moves it no matter
226 where you are on earth.

227
228 The magnetic force is an intelligent force unparallel to human understanding, it is the invisible
229 composition of force(p), power(e) and time(n) of each atom that:

230
231 a. Is aware of its existence before our consciousness is born and after our consciousness
232 is finished.
233 b. Allows us to have a will throughout our consciousness applied by external-internal
234 factors and self-awareness such as growth, learning and exploring processes.
235 c. It remembers every smallest change within our life and consciousness and with its
236 magnetic like principle of power able to near-instantly adjust like a computer binary
237 IO memory system that N-S magnetic properties of atoms able to write-apply changes
238 internally in our bodies-atoms and extremally environment as its also composed of
239 magnetic matter and radio-like communication.

240
241 The Universe magnetic like life system is connected, fast, ample and memorable that it can create life,
242 allows us to verify if we like it, and what we don't like it consciously and sub-consciously able to
243 implement in to our next life whether on this on our planet on same or form and gender on this and other
244 universe, possibly able to take us back in time, however my life was not easy and I hope I am never going
245 back in time, unless it's to some back in time life on different planet or universe that I will be in the future
246 consciousness.

247
248 I also believe that our indigenous Arcticus Blancus ancestors have found a way to eternal life and death
249 thru connection with the darkness of the Arctic. We coexist with all our white hair indigenous species at
250 all times in a joined spiritual life that allows us to better understand the needs of our climatic territory and
251 all of mammals, fish, birds, insects, plants, natural forces of the arctic and outer space above us and the

252 land below. Stay connected to indigenous life and the universe might open for us the door to another
253 world if this one fails to respect the species, climate, lands and borders.

254
255 This planet is a gravity orbiting intelligent organism, and we are its polar organ like hair are the
256 appendages of the skin. This planet's evolution has failed to allow all species nonviolent forms of self-
257 control. Some say we come from apes, but evolution goes deep into the oceans where the first fish lived.
258 The planet's climate is not the best, and fish can lose its path if it loses its scent. Some fish got lost in the
259 rivers of amazon and became snakes, but it's not their fault, it's the climate and abundance of life. To
260 understand evolution is to understand its problems and know the solutions.

261
262 If you want to be like God and co-create life in the deep of the space, you can in theory if you find the
263 path to it. My path is to return to vast space and rest until it's safe to think about a new life and a new
264 world. Feel free to explore your personal path as indigenous Arctic Magnetic Earth Naturalist, to share
265 the knowledge of the good and evil to make universe a better place for us and our co-connected species,
266 planets, galaxies.
