14<sup>TH</sup> OF JULY 2025

## CITY OF KATOWICE **International Labour** Organization **Request to Convene a New Tribal and Indigenous Peoples Convention** Notification of Eugenix P.S.A. Climate Initiatives Director-General Gilbert F. Houngbo 4, Route des Morillons 1211 Geneva 22 Switzerland Dear Director-General, Houngbo, On behalf of Eugenix P.S.A. (Simple Stock Corporation of the Arcticus Blancus ethnic group) and the Arcticus Blancus community, we respectfully request that the ILO convene a new Tribal and Indigenous Peoples Convention focused on ethnic climatic tribes. Current frameworks do not recognize the unique territorial economic rights of communities whose cultural identity and survival are bound to indigenous climatic territories. 1. Convene a New Convention We propose the creation of a dedicated convention that: a. Defines "climatic ethnicity" and recognizes tribal and indigenous peoples whose livelihoods, cultures, and economies are threatened by climate change and expending one way migration. b. Establishes territorial "ethnic climatic economic rights", granting these groups legal control over resource management, ecological stewardship, and revenue from sustainable development on their ancestral lands.

29	c. Incorporates annexes to existing "Genocide Prevention Resolution" and "Antarctic Treaty"
30	governance instruments, ensuring protection against extinction, economic discrimination, and
31	unauthorized exploitation.
32	
33	2. Notification of Eugenix P.S.A. Climate Infrastructure Program
34	
35	In response to accelerating polar warming, Eugenix P.S.A. has formed a specialized entity to address
36	climatic destabilization. Our flagship initiative - the Polar Geomagnetic Infrastructure Program - will
37	construct:
38	a. Two Arctic Geomagnetic Dams; one temporary dam in Canada to modulate geomagnetic flux,
39	and one permanent dam north of Greenland to completely stabilize atmospheric patterns and
40	prevent complete rain and xero cycle collapse.
41	b. One Antarctic Geomagnetic Dam, constructed after strategic ice-removal operations are
42	completed to restore global climate balance and improve freshwater availability.
43	These installations aim to safeguard indigenous territories, enhance navigability, and secure long-term
44	ecological resilience.
45	
46	<b>3. Economic and Social Inclusion Measures</b>

## 5. Budget and Projected Economic Growth

69

Our Polar Ice Removal Program is entirely funded by climate-linked share sales. We target a capital raise of USD 300–500 trillion over a 100–1,000-year horizon thru ice sales priced at €0.03 per m<sup>3</sup> in the present gold price of 3000 euro per 1 ounce. The economic benefits to the communities and economies of the shareholders states based on the water consumption and cost to obtain drinkable water free from chemical and biological pathogenic hazards is valued at 10-100 times.

75

The economic, ethnic and climatic benefits will last for the duration of the ice removal program and geomagnetic arctic dams' construction that benefits indigenous arctic and sub arctic ethnic economies and allows for parallel economic growth for the rafaltic and aquatic ethnicities after the ice is removed and Antarctic dams are operational.

80

We believe these measures establish a replicable model for indigenous-led climate adaptation and
economic empowerment. We welcome the ILO's guidance on integrating these proposals into your
Convention agenda and stand ready to collaborate on technical, legal, and cultural aspects.

Thank you for your attention and leadership in advancing tribal and indigenous rights in an era of unprecedented climatic change. I am more than happy to meet over the internet to present any of the needs in more detail and explain any information's included in the presented attachments.
