BUSINESS AND INVESTMENT PLAN OF THE SIMPLE JOINT-STOCK COMPANY OF THE ARCTICUS BLANCUS ETHNIC GROUP

EUGENIX® P.S.A.

9 BRIEF DESCRIPTION OF THE GOALS OF THE OLDEST NATURAL ETHNIC
 10 GROUP OF THE ARCTIC CLIMATE, ARCTICUS BLANCUS, FOCUSED ON
 11 CLIMATE RESTORATION AND THE HEALTH AND RIGHTS OF ETHNIC
 12 POPULATIONS.

Mission and Legal Basis. The Simple Joint-Stock Company Eugenix® P.S.A was founded to 15 1. represent the oldest tribal ethnic group adapted to Arctic climate conditions – the Arcticus Blancus. 16 17 Eugenix advocates for Arcticus Blancus by taking action to prevent genocide, relying on international resolutions that recognize equal rights for ethnic groups, especially the rights to birth, health, and life, as 18 19 expressed in UN Resolution A/RES/260/III from 1948. As part of restoring the natural and internationally 20 recognized rights to life, health, and reproduction for Arcticus Blancus, Eugenix writes legal proposals to amend laws that endanger the survival of this group—arguing that these laws not only risk the extinction 21 of Arcticus Blancus but also contribute to global climate catastrophe. 22

23

24 2. Ethnic Rights and Climate Habitat Philosophy. Eugenix P.S.A, in its commitment to
 25 protecting the Arcticus Blancus ethnic group and its equal right to coexist among other ethnic populations,
 advocates for the preservation of the group's natural climatic habitat and economy. This mission is founded
 27 on the Arcticus Blancus theory, researched by Eugenix's founder, descended from the Piast and Vasa
 dynasties. According to this theory, the planet's protective magnetic field is weakened due to the natural
 29 properties of water existing as ice at the poles. That ice obstructs the flow of natural geomagnetic waves

between the North and South poles, which would otherwise enable stronger reflection and refraction of
 cosmic ultraviolet radiation. Strengthening this flow is believed to amplify the power of Earth's
 magnetosphere, improving planetary defense against UV radiation.

33

3. 34 Climate Disruption and Advocacy for Territorial Rights. Excessive ultraviolet wave energy, 35 combined with free carbon compounds, causes atmospheric warming. This leads to a lack of long, moderate, and regular rainfall and cloud cover-both of which naturally reduce the temperature of the 36 atmosphere and the surface of the entire planet. As part of its efforts to protect the natural climatic habitat 37 38 and economic sustainability of the Arcticus Blancus group, Eugenix has petitioned Antarctic Treaty nations and the United Nations to restore Arcticus Blancus' rights to the Arctic and Antarctic regions, emphasizing 39 that this ethnic group holds inherent rights to continue its existence and pursue a plan to restore the Earth's 40 41 magnetic field.

42

43 4. **Magnetic Field Restoration Strategy.** The restoration of Earth's magnetic field by Eugenix
44 P.S.A. with Arcticus Blancus is linked to the sale of Antarctic ice, which would help partially relieve
45 magnetic pressure on the planet. Revenue from this initiative would fund further scientific research by
46 Arcticus Blancus, especially the construction of large-scale Arctic and Antarctic dams. These dams would,
47 in the future, enable precise control of geomagnetic values, providing:

48

49

50

- S

a. Complete control of ultraviolet radiation permeability through the magnetosphere."

b. Natural protection and regeneration of Arctic groups through the magnetosphere's ability to renew all living organisms at the cellular level."

51

52 5. <u>In Legal Formation and Intellectual Property.</u> The founder of the Simple Joint-Stock Company
53 Eugenix P.S.A. registered the company in the National Court Register of Poland to carry out the previously
54 stated goals. The company was officially assigned relevant PKD business activity codes in line with
55 Eugenix P.S.A. planned operations. Additionally, the founder registered the word trademark Eugenix®
56 with the Polish Patent Office and acquired rights to the internet domains eugenix.org and
57 arcticusblancus.org. Eugenix will carry out activities according to the registered PKD classifications for
58 Eugenix P.S.A., as well as under the Nice Classification codes associated with the trademark Eugenix®.

- 59
- 60

6. **ⁱ** Nice Classification Codes associated with the registered Eugenix® trademark:

61

Class 5 – Medical, Pharmaceutical, and Biotech Goods.

a.

Biological and Cellular Preparations.
Biological preparations for medical purposes.
Biological tissue cultures for medical use.
Cells for medical purposes.
Stem cells.
Cultures of microorganisms for medical and veterinary purposes.
Cultures for medical use.
Cultures for veterinary use.
Implants and Transplants.
Biological implants.
Surgical implants derived from stem cells.
Surgical implants composed of living tissues.
Surgical implants cultivated from stem cells [live tissues].
Implants for guided tissue regeneration.
Implants containing living tissues.
Materials for implantation for guided tissue regeneration.
Living organs and tissues for surgical use.
Human tissue for allogeneic transplants.
Arterial grafts.
Coronary artery bypass grafts.
Skin grafts.
Grafts [live tissues].
Implantable textile material to stimulate tissue growth.
Biological tissue for transplantation.
Processed human donor skin for soft tissue replacement.
. Pharmaceuticals and Therapeutic Agents.
Pharmaceuticals and natural remedies.
Medical alcohol.
Rubbing alcohol.
Alcohol for pharmaceutical purposes.
Transdermal patches for administering drugs.
Transcutaneous patches.

94	🧼 IV. H	lygiene and Personal Care.
95	i.	Baby bottom care balms for medical purposes.
96	ii.	Hygienic preparations and articles.
97	iii.	Dental and medical preparations and products for cleaning teeth.
98	iv.	Preparations for air deodorization and purification.
99	v.	Dental preparations and products.
100	🤷 V. Fi	rst Aid and Medical Kits.
101	i.	First aid kits for domestic use.
102	ii.	First aid kits sold with equipment.
103	iii.	Equipped first aid kits.
104	iv.	Medical dressings, dressing materials and applicators.
105	V.	Shoulder straps for surgical purposes.
106	📀 VI. L	aboratory and Diagnostic Tools.
107	i.	Diagnostic tools and materials for medical and veterinary use.
108	ii.	Reagents for microbiological analysis [for medical purposes].
109	iii.	Diagnostic reagents for medical use.
110	iv.	Medical diagnostic test strips.
111	v.	Diagnostic test materials for medical use.
112	vi.	Medical diagnostic reagents.
113	vii.	Diagnostic biomarkers for medical use.
114	viii.	Chemically processed paper for occult blood detection in stool.
115	🤌 VII. (Chemical and Biological Reagents.
116	i.	Chemical reagents for medical use.
117	ii.	Chemical reagents for veterinary use.
118	iii.	Chemical reagents for medical or veterinary purposes.
119	iv.	Chemical test reagents [medical].
120	v.	Chemical test reagents [veterinary].
121	vi.	Chemical diagnostic reagents for medical use.
122	vii.	Biological reagents for medical use.
123	viii.	Biological reagents for veterinary use.
124	ix.	Clinical medical reagents.
125	b. 💠 Class 36	– Financial and Insurance Services.

b. 💸 Class 36 – Financial and Insurance Services.

126	i. Organization of fundraising activities.
127	ii. Fundraising and financial sponsorship.
128	iii. Collection of funds and financial sponsorship.
129	iv. Insurance services.
130	v. Issuance of prepaid cards and vouchers.
131	vi. Insurance (general).
132	
133	7. 📳 Eugenix® P.S.A – PKD Business Activity Codes.
134	a. PKD 21. Production of basic pharmaceutical substances and manufacture of medicines and
135	other pharmaceutical products.
136	b. PKD 47. Retail trade.
137	c. PKD 58. Publishing activities.
138	d. PKD 72. Scientific research and development.
139	e. PKD 82. Office administrative support and auxiliary business services.
140	f. PKD 86. Healthcare.
141	g. PKD 86.99D. Other healthcare services.
142	h. PKD 87. Social assistance services with accommodation.
143	i. PKD 96. Personal service activities.
144	
145	8. § Funding Sources for Eugenix® P.S.A. To achieve the objectives outlined in sections 1 through
146	4 — categorized into climate, health, and ethnic goals - Eugenix® P.S.A. will acquire financial resources
147	from the following sources:
148	a. 🔵 For Climate Goals. To pursue its climate objectives, Eugenix® P.S.A. will obtain
149	financial resources from the following sources:
150	i. Issuance of ice bonds from Arcticus Blancus territories, represented as shares in
151	Eugenix® P.S.A.
152	ii. Allocation of a portion of interest from a dedicated savings deposit account, which wil
153	receive proceeds from Eugenix® P.S.A. share issuance.
154	b. 🧇 For Health Goals. To pursue its health objectives, Eugenix® P.S.A. will obtain
155	financial resources from the following sources:

156		i. Allocat	tion of a portion of interest from the savings deposit account (funded by share
157		issuanc	e) toward the construction of an Ethnic Healthcare Facility for the Arcticus
158		Blancu	s group.
159		ii. Sales c	f promotional materials, company publications, and gift cards redeemable for
160		service	s provided by the Ethnic Healthcare Facility.
161	i	ii. Accept	ance of donations from private individuals and institutions.
162	с. 🛉	Ethnic G	oals. To pursue its ethnic objectives, Eugenix® P.S.A. will obtain financial
163	re	sources from	m the following sources:
164		i. Fundin	g through the Electronic Grant Distribution System (ESUD), which supports
165		protect	ion, preservation, and development of the cultural identity of national and
166		ethnic	minorities. Eugenix® P.S.A. is registered in this system.
167	:	ii. Income	e from granting commercial rights to use scientific publications related to ethnic
168		health	protection issued by Eugenix®. These will serve the needs of healthcare and
169		researc	h institutions conducting comparative studies of ethnic groups.
170	i	ii. Acquis	ition of awarded financial compensation or targeted grants arising from rulings
171		issued	by The Constitutional Tribunal, Various ministries, Judicial verdicts following
172		the sub	mission of more than five legal notifications identifying irregularities in
173		nationa	al laws and violations of UN Resolution A/RES/260/III. These notifications
174		include	e challenges to:
175		i)	The Infertility Treatment Act of June 25, 2015
176		ii)	The Marriage Act of February 25, 1969
177		iii)	The Act on Publicly Funded Healthcare Benefits of August 27, 2004
178		iv)	The Regulation by the Minister of Health on the Polish Registry of Congenital
179			Developmental Defects from June 21, 2018
180		v)	A notification of incitement to genocide against ethnic groups, dated April 21,
181			2025
182		vi)	Documentation of genocide against the Arcticus Blancus group, dated April 25,
183			2025
184			
185	9. 👹 C	ore Climate	e Objective. One of the main objectives of the company is to acquire financial
186	resources for	r the realiza	tion of climate goals outlined in paragraph four (4). That section describes
187	Eugenix® P.	S.A.'s plan	to sell Antarctic ice to nations within Rafaltic territories, to meet their vital and

health-related needs. The purpose is to relieve pressure on the planet's magnetic field, improve the natural xerocycle (dry cycle) of water across the globe, and raise funds for research and the construction of Antarctic dams that will prevent excessive glaciation at the poles helping achieve optimal magnetic field strength.

192

193 10. Ice Bonds Strategy. To obtain such funds, Eugenix® P.S.A intends to issue ICE BONDS in 194 the form of company shares, following the principles outlined in paragraph eleven (11). Countries 195 interested in climate repair that purchase Eugenix® P.S.A shares will jointly present, alongside Eugenix® 196 P.S.A, a new Antarctic Treaty to the United Nations. Under this treaty, Eugenix® P.S.A will become the 197 administrator of Antarctic and Arctic territories on behalf of the Arcticus Blancus ethnic group—with the 198 mission of repairing the climate and protecting this endangered population.

199

Principles of Eugenix® P.S.A. Shares Entitling Holders to Antarctic Ice upon Eugenix®
 P.S.A. obtaining rights to Antarctic territories thru co-sponsored UN Resolution by shareholders UN
 representatives with Eugenix P.S.A.

203

204

209

210

211

212

213

214

215

Who is eligible to purchase Ice Bonds for Antarctic ice, issued as shares in the Simple Joint-Stock Company Eugenix® P.S.A.?

- i. Eugenix authorizes the purchase of company shares by countries whose territories are
 located, at least in part, within the Rafaltic region, defined as being between 41°45' North
 latitude and 41°45' South latitude. These countries must have a high demand for fresh
 water for pharmaceutical, food, hygiene, agricultural, and industrial purposes.
 - Eugenix also authorizes the purchase of shares by public and private entities, including banks, that are registered in nations with territory within the Rafaltic region (again, defined as between 41°45' North and 41°45' South latitude) and have a strong need for fresh water for pharmaceutical, food, hygiene, agricultural, and industrial use.

b. 📦 Antarctic Ice Volume and Required Removal for Magnetic Field Optimization.

- The quantity of ice covering Antarctica has an estimated surface area of 20,000,000 km²,
 with thickness ranging from several hundred meters to over five kilometers.
- ii. Based on calculations by Eugenix P.S.A., the volume of ice that needs to be removed to
 improve the planet's magnetic field and uncover sufficient territory for the construction
 of an Antarctic dam is over 2,500,000 km² in surface area ice thickness again ranging

219			fi	rom hundreds of meters to more than 5 km resulting in an approximate ice volume of
220			1	0,000,000 km ³ .
221		c.	💰 Cost	t, Value, and Share Allocation of Eugenix® P.S.A.
222			i. T	The total planned volume of ice extraction is 10,000,000 km ³ , which is divided into
223			1	00,000 company shares of Eugenix® P.S.A.
224			ii. C	One company share entitles the holder to 100 km ³ of ice.
225			iii. T	The price of 1 m ³ of ice is calculated based on 100,000 m ³ equaling 1 ounce of gold (Au
226			9	9.999%), priced at €3,000 per ounce, which equals €0.030 per m ³ of ice.
227		d.	撞 Logi	istics and Shipping Value.
228			i. A	A Panama Max cargo ship has an estimated capacity of 500,000 m ³ of ice.
229			ii. S	shipping this volume requires 5 ounces of Au 99.999% gold.
230			iii. 1	km ³ of ice = 1,000,000,000 m ³ , requiring 2,000 Panama Max ships.
231			iv. T	Therefore, 1 Eugenix® share = 100 km ³ of ice, requiring 200,000 Panama Max ships.
232		e.	📕 Shai	re Pricing and Total Asset Valuation.
233			i. E	Each share (100 km ³ of ice) corresponds to 1 million ounces of gold (Au 99.999%).
234			ii. A	At a price of 3,000 euro per 1 ounce of Au 99.999% gold, the cost of one share of
235			E	Eugenix P.S.A. amounts to 3 billion euro.
236			iii. T	The total value of all 100,000 shares: \notin 3 billion × 100,000 shares = \notin 300 trillion euro.
237		f.	💰 Final	ncial resources obtained from the sale of shares should enable:
238			i. D	Design and construction of the Antarctic dam.
239			ii. D	Design and construction of the Arctic dam.
240			iii. T	The dams will be financed, if needed, through the sale of futures contracts for the
241			d	elivery of magnetic fields that enhance rainfall.
242			iv. T	ime-bound intergovernmental agreements at the United Nations level will enable the
243			fi	inancing of construction and operational costs of Geomagnetic Dams using tax
244			re	evenues from UN member states, treated as an investment in Geomagnetic Dams.
245				
246	12.		Duratio	n of Antarctic Ice Extraction for Geomagnetic Dam Construction.
247		a.	Eugenix	® P.S.A. calculates that if 5,000 extraction platforms operate simultaneously, each
248			filling to	en Panama Max-class vessels daily, then the annual ice extraction would total
249			approxin	nately 10,000 km ³ . 5000 x 10 x 500,000 m3 x $365 = 9,125$ km3 $\sim 10,000$ km3.

- i. At this rate, it would be possible to extract the full 10,000,000 km³ of planned ice over
 the course of 1,000 years, using a fleet of 2,250,000 to 3,000,000 Panama Max-class
 ships, each returning every 45 to 60 days for a new load of 500,000 m³ of ice. 10,000,000
 km3 / 10,000 km3 = 1000 years.
- b. In an alternative approach, if 5,000 specialized cutting platforms are used to slice ice into blocks measuring 1,000m × 500m × 100m, and these blocks are towed by special ice-hauling vessels, the annual extraction rate would reach approximately 100,000 km³. 1000 m x 500 m x 100 m x 5000 x 365 = 91,250 km³ ~100,000 km³.
- i. Enabling the full 10,000,000 km³ to be mined within 100 years. This would require
 200,000 to 300,000 towing vessels, also returning every 45 to 60 days for the next ice
 block of that size.10,000,000 km³ / 100,000 km³ = 100 years.
- 261

13. Acquisition of Shares via Deposits in Eugenix® P.S.A. The acquisition of Eugenix® P.S.A.
shares — until the establishment of a new Antarctic Treaty is executed through a notarial agreement

between Eugenix® P.S.A. and the share purchaser.

- a. Upon signing the notarial agreement specifying the number of shares purchased, the buyer
 deposits 1% of the value of the acquired shares into Eugenix® P.S.A.'s company account.
- b. The deposit value for one share is 1% of 1 million ounces of gold (Au 99.999%), equals 10,000
 ounces of Au 99.999% gold.
- 269

i. At a price of €3,000 per ounce, the deposit per share amounts to €30 million euro.

- ii. The buyer transfers the deposit using the currency and gold exchange rate defined in the notarial agreement.
- c. The buyer is then obliged to pay the remaining value of the purchased shares in gold,
 continuously and proportionally to the amount of ice extracted with at least one share's worth
 of ice paid in full before that corresponding quantity of ice is mined, functioning under a
 deferred (debit-based) model.
- 276

14. Where to Deposit Gold Following UN Approval of the Antarctic Treaty. The location and
method for transferring gold payments will be specified to all shareholders after the United Nations
officially approves the new Antarctic Treaty that authorizes Eugenix® P.S.A., together with the Arcticus
Blancus ethnic group, to extract ice and lead climate restoration efforts on behalf of nations holding
Eugenix® P.S.A. shares.

282

a. Once the treaty is ratified, Eugenix® P.S.A. will secure agreements with banks capable of

storing gold within the northern territories of Arcticus Blancus, most likely located in one or 283 284 several of the locations that include: Alaska, Canada, Greenland, Iceland, Scandinavia, Russia. 285 286 15. **Maximum and Minimum Share Acquisition via Deposits.** Eugenix® P.S.A. permits depositbased acquisition of shares in both maximum and minimum quantities. 287 The maximum number of shares that may be acquired by an individual shareholder is calculated 288 a. 289 through an equal distribution of 10,000,000 km³ of ice, equivalent to 100,000 company shares, 290 across a global population of 10,000,000,000 people which results in 1 km³ of ice per 1,000 291 individuals. 292 b. The minimum purchase is defined as one (1) company share, entitling the shareholder to 100 293 km³ of ice. 294 c. In the event of a decrease or increase in global population during the extraction process, 295 Eugenix® P.S.A. will recalculate the maximum number of shares each country and its internal 296 entities may acquire, based on the updated number of citizens in those shareholder states. 297 298 16. **Withdrawal from Share Purchase and Deposit Refunds.** Eugenix® P.S.A. permits investors to withdraw from purchased shares, and offers the possibility of a deposit refund, reduced by contractual 299 300 costs specified in the notarial agreement for Eugenix® P.S.A. share acquisition. Eugenix retains 10% of 301 the deposit amount to cover expenses related to: a. Legal counsel services for preparing the agreement between United Nations, Eugenix P.S.A and 302 303 shareholders aimed at formalizing the rights of Eugenix® and the Arcticus Blancus ethnic group to manage their territories and lead climate restoration efforts. 304 305 b. Legal proceedings between the United Nations and Eugenix® P.S.A., aimed at formalizing the rights of Eugenix® and the Arcticus Blancus ethnic group to manage their territories and lead 306 307 climate restoration efforts. 308 c. Internal and external expenses Eugenix P.S.A must cover to maintain the efforts aimed at 309 formalizing the rights of Eugenix® and the Arcticus Blancus ethnic group to manage their territories 310 and lead climate restoration efforts not limited to: 311 i. Conferences, exhibitions, communication with all shareholders. 312 ii. Conferences, exhibitions, communication with United Nations representatives from the 313 shareholders state and from no shareholding states.

- 314 315
- iii. Contracting of all necessary internal staff and coverage of all internal expenses associated to work with shareholders, United Nations and other regulatory bodies.
- 316

317 17. ⁽ⁱⁱⁱ⁾ UN Support Agreement Strategy. Eugenix[®] P.S.A. will require support from nations 318 purchasing its shares to earn the trust of the United Nations and accelerate approval of a resolution that 319 enables shareholders to begin ice extraction and allows Arcticus Blancus engineers and subcontractors to 320 plan the construction of the Arctic and Antarctic geomagnetic dams. The timeline for the resolution's 321 approval by the UN depends heavily on:

- a. Close collaboration between shareholders and Eugenix® P.S.A.
- b. Completion of necessary formalities requested by the United Nations, both from Eugenix P.S.A,
 the shareholders and the Arcticus Blancus ethnic group efforts.
- c. Eugenix® P.S.A. hopes that a jointly submitted request will lead to the UN enacting a new resolution within one to three years.
- 327

322

18. Fossil Fuel Access & Energy Credit Repayment. The properly constructed resolution should
also empower Arcticus Blancus to manage fossil fuel deposits, which could be partially loaned on credit
terms to shareholders for:

- a. Ice extraction from Antarctica.
- b. Operation of shareholder fleets transporting ice to their Rafaltic territories.
- c. Any extractable natural resources for such purposes will be provided as energy loans, measured
 in units like gigajoules, megawatts, etc.
- d. Arcticus Blancus, as the energy provider, will demand a formal agreement from each
 shareholder state using the energy guaranteeing the repayment of an equivalent amount of
 energy, potentially in a different form that Arcticus Blancus and Eugenix® P.S.A. can use in
 Antarctic dam construction.
- e. Eugenix® P.S.A. will require installment-based energy repayment, and all terms related to such
 natural resource loans will be governed by a separate agreement prepared by Arcticus Blancus
 with Eugenix P.S.A.
- 342

343 19. 💸 Additional Costs Related to Ice Extraction from the Antarctic Arcticus Blancus

Territories. Outlined in Eugenix® P.S.A.'s First Petition to Antarctic Treaty parties, these obligations and
 fees apply to shareholders involved in operations on the continent:

346	a.	🎋 I	Explosives Tax. Eugenix® P.S.A. will impose a tax on all explosives used for accessing
347		and f	Fracturing ice sheets from coastal zones into polar regions.
348		i.	This tax will finance geomagnetic research and development, including radiation-free
349			nuclear operations.
350		ii.	Entities may use their own explosives, provided they comply with all current and future
351			International Chemical Standards and Conventions to ensure safety for water and
352			biological life affected by explosive use.
353		iii.	Entities that do not use explosives will benefit from a reduced tax rate.
354	b.		Emergency Medical Infrastructure Tax. To develop Arcticus Blancus emergency
355		medi	cal facilities, Eugenix® P.S.A. will levy a tax covering life-threatening incidents and
356		work	place accidents in Antarctica:
357		i.	This includes urgent hospitalization needs and evacuations to Australia, South America,
358			or Africa.
359		ii.	The tax does not exempt entities from their duty to provide proper safety and life-saving
360			measures until such hospitals are opened.
361		iii.	Entities may also operate their own medical centers and vehicles.
362	c.	📑 I	Infrastructure Bond Requirement. Any entity that places permanent infrastructure or
363		vehic	eles on land for ice removal, transportation, natural resource extraction, or scientific
364		resea	rch must deposit an Infrastructure Deconstruction Bond with the Arcticus Blancus Tribal
365		Bank	
366		i.	This bond ensures funding to dismantle or remove abandoned or inactive structures left
367			behind by entities that cease operations or fail to follow through.
368		ii.	The Tribal Bank will cover unexpected removals due to its financial strength.
369			
370	20.	Cost	ts and Operations Independent of Eugenix® P.S.A. Covered Solely by Shareholders.
371	The follow	wing ex	xpenses and operational responsibilities are entirely borne by shareholders, not Eugenix®
372	P.S.A.:		
373	a.	<u></u>	Marine & Ice Infrastructure. All costs related to the design, construction, and operation
374		of ma	aritime and ice infrastructure. These pertain to ice extraction from areas designated by
375		Euge	nix P.S.A. and allocated to the Arcticus Blancus group.

376	b.	Construction and Operation of Shareholder Maritime Fleets. All costs associated with
377		designing, building, and operating appropriate suitable marine fleets. Those fleets:
378		i. Must be built using mineral resources sourced from the shareholders' own national
379		territories.
380		ii. Must be designed and tested based on independent studies identifying the most effective
381		methods for transporting ice from Antarctica whether towing large blocks, applying
382		advanced maritime solutions, or exploring alternative approaches.
383	c.	Local Infrastructure on Shareholder Territory. All costs related to the design,
384		construction, and operation of local infrastructure within shareholder territory are the sole
385		responsibility of the shareholder. This includes, but is not limited to:
386		i. 🛁 Port Facilities at Destination Hubs Construction or adaptation of receiving
387		terminals capable of docking ice-transport vessels, equipped for unloading, safety
388		inspection, and cold-chain continuity.
389		ii. G Advanced Filtration Systems Installation of systems capable of removing salt,
390		sediment, microplastics, and airborne contaminants introduced during maritime
391		transport. Optional integration with mineral recovery modules, converting impurities
392		into usable industrial by-products.
393		iii. 🧪 Independent Ice and Water Sampling & Testing Laboratories Local facilities
394		and mobile units for collecting and testing samples of ice and melted water according to
395		shareholders' domestic health and purity standards. Accreditation processes for
396		compliance with both internal and UN environmental water protocols.
397		iv. Distribution Networks and Processing Centers Regional systems for cold storage,
398		processing, and delivery logistics, ensuring efficient handling from port to end-user
399		(citizens, industry, agriculture). Includes remote pipelines, rail containers, electric tanker
400		fleets, or urban distribution nodes.
401		v. Security and Monitoring Systems Implementation of satellite-linked tracking for
402		ice shipments, perimeter protection at processing sites, and encryption systems for
403		safeguarding extraction data.
404		vi. Figure Section 4 For the support of the suppo
405		filtration, testing, and distribution operations-preferably leveraging renewable energy
406		systems (solar, geothermal, hydrogen cell).

407 vii. Digital Integration & Climate Data Exchange Deployment of IoT-connected
408 sensors, data collection servers, and stakeholder portals to transmit water purity, melting
409 rates, and delivery metrics to Arcticus Blancus and UN resolution bodies.

410

21. So Collaborative Development and Future Initiatives. Eugenix® P.S.A. will make every effort
to ensure that all shareholders can exchange research, technological, engineering, and design insights
enabling them to detect errors and identify innovations that lead to more efficient ice extraction, transport,
and processing (including unloading, filtration, and water distribution on their respective climate
territories).

416

417 22. in Joint Consultation and Exhibition Spaces. With the consent of shareholders, Eugenix® will
418 establish a shared space for consultations and exhibitions, both virtually and in a physical location.
419 Shareholders will have the opportunity to collaborate and work on individual and joint project initiatives
420 that includes all legal work related to the resolution preparation. The location will be decided collectively
421 by the shareholders.

422

23. Responsibilities of Eugenix P.S.A and Creation of the Eugenix® Foundation. The activities
described in paragraphs 1 through 4, climate, health, and ethnic objectives—will also be incorporated into
the charter of a future Eugenix® Foundation. This Foundation, financed by Eugenix® P.S.A., will carry
out all ethnic and health-related missions, as well as climatic and environmental goals not directly
connected to the core operations of the company, which primarily focuses on:

- a. *Issuing and sale of Eugenix P.S.A company shares* that allow shareholders and Eugenix
 P.S.A. with Arcticus Blancus ethnic group funds to cover legal access to ice and territories of
 both polar regions.
- b. **©** Establishment of a new Antarctic Treaty in cooperation with shareholders and United
 Nations that grants access to territories and resources in Antarctica and the Arctic to Eugenix®
 P.S.A. with the Arcticus Blancus ethnic group for the purpose of climate restoration and
 shareholder access to ice reserves secured thru Eugenix P.S.A and simple stock corporation of
 the Arcticus Blancus ethnic climatic group based on:

459	C169 - Indigenous and Tribal Peoples Convention, 1989 (No. 169)
460	
461	PART II. LAND
462	
463	Article 13
464	1. In applying the provisions of this Part of the Convention governments shall respect the special
465	importance for the cultures and spiritual values of the peoples concerned of their relationship with the
466	lands or territories, or both as applicable, which they occupy or otherwise use, and in particular the
467	collective aspects of this relationship.
468	2. The use of the term lands in Articles 15 and 16 shall include the concept of territories, which covers
469	the total environment of the areas which the peoples concerned occupy or otherwise use.
470	Article 14
471	1. The rights of ownership and possession of the peoples concerned over the lands which they
472	traditionally occupy shall be recognised. In addition, measures shall be taken in appropriate cases to
473	safeguard the right of the peoples concerned to use lands not exclusively occupied by them, but to which
474	they have traditionally had access for their subsistence and traditional activities. Particular attention shall
475	be paid to the situation of nomadic peoples and shifting cultivators in this respect.
476	2. Governments shall take steps as necessary to identify the lands which the peoples concerned
477	traditionally occupy, and to guarantee effective protection of their rights of ownership and possession.
478	3. Adequate procedures shall be established within the national legal system to resolve land claims by the
479	peoples concerned.
480	Article 15
481	1. The rights of the peoples concerned to the natural resources pertaining to their lands shall be specially
482	safeguarded. These rights include the right of these peoples to participate in the use, management and
483	conservation of these resources.
484	2. In cases in which the State retains the ownership of mineral or sub-surface resources or rights to other
485	resources pertaining to lands, governments shall establish or maintain procedures through which they
486	shall consult these peoples, with a view to ascertaining whether and to what degree their interests would
487	be prejudiced, before undertaking or permitting any programmes for the exploration or exploitation of
488	such resources pertaining to their lands. The peoples concerned shall wherever possible participate in the
489	benefits of such activities, and shall receive fair compensation for any damages which they may sustain
490	as a result of such activities.
491	Article 16
	EUGENIX ® P.S.A. PROSTA SPÓŁKA AKCYJNA ETNICZNE I GRUPY ARCTICUS BLANCUS NIP 9542888529 KRS 000175132 PEGON 54181661300000

492 1. Subject to the following paragraphs of this Article, the peoples concerned shall not be removed from493 the lands which they occupy.

Where the relocation of these peoples is considered necessary as an exceptional measure, such
relocation shall take place only with their free and informed consent. Where their consent cannot be
obtained, such relocation shall take place only following appropriate procedures established by national
laws and regulations, including public inquiries where appropriate, which provide the opportunity for
effective representation of the peoples concerned.

3. Whenever possible, these peoples shall have the right to return to their traditional lands, as soon as thegrounds for relocation cease to exist.

501 4. When such return is not possible, as determined by agreement or, in the absence of such agreement,

through appropriate procedures, these peoples shall be provided in all possible cases with lands of quality

and legal status at least equal to that of the lands previously occupied by them, suitable to provide for

their present needs and future development. Where the peoples concerned express a preference for

505 compensation in money or in kind, they shall be so compensated under appropriate guarantees.

506 5. Persons thus relocated shall be fully compensated for any resulting loss or injury.

507

Article 17

508 1. Procedures established by the peoples concerned for the transmission of land rights among members of509 these peoples shall be respected.

510 2. The peoples concerned shall be consulted whenever consideration is being given to their capacity to

alienate their lands or otherwise transmit their rights outside their own community.

512 3. Persons not belonging to these peoples shall be prevented from taking advantage of their customs or of

513 lack of understanding of the laws on the part of their members to secure the ownership, possession or use514 of land belonging to them.

515

Article 18

Adequate penalties shall be established by law for unauthorised intrusion upon, or use of, the lands of the
peoples concerned, and governments shall take measures to prevent such offences.

518

Article 19

519 National agrarian programmes shall secure to the peoples concerned treatment equivalent to that accorded520 to other sectors of the population with regard to:

521 (a) the provision of more land for these peoples when they have not the area necessary for providing the

522 essentials of a normal existence, or for any possible increase in their numbers;

523 (b) the provision of the means required to promote the development of the lands which these peoples

already possess.
