4 **EUGENIX® EU PETITION FOR THE PROTECTION OF**
5 **INDIGENOUS POLAR BIODIVERSITY FARMED AND BRED**
6 **IN THE STATES OF THE EUROPEAN UNION**

7
8
9 **INTRODUCTION**

10
11 Eugenix P.S.A. indigenous actions are always intended to protect the Arcticus Blancus indigenous
12 polar hair tribal group and even greater number of biological and botanical species that have only one
13 indigenous polar climate that allows for the sustainment of the entire polar ecosystem thru indigenous
14 species of plants, fish, mammals, etc. symbiosed to each other in a common climate when human
15 practices protect their unchanged existence in accordance with the primary indigenous nature, Arcticus
16 Blancus indigenous believes and United Nations protections that protect natural indigenous biodiversity
17 as defined in the United Nations Convention on Biological Biodiversity (1992) - UN Treaty vol. 1760 no.
18 30619, ratified by the EU member states.

19
20 **PURPOSE**

21
22 Indigenous biodiversity is core and vital element of the indigenous community that intends to
23 protect its indigenous species genetic heritage based on found tribal principles to protect polar species
24 physical characteristics developed to integrate with polar conditions and entire polar ecosystem. Eugenix
25 P.S.A. petition to the European Union parliament intends to protect indigenous polar species of animals
26 farmed in the European Union member states that have control over the fishing and farming policy within
27 the EU market.

Eugenix P.S.A. proposes to the European Union Parliament to prohibit crossbreeding of indigenous polar farms animal species based on the Arcticus Blancus indigenous believes and principals in accordance with the rights to control and protect the genetic heritage and indigenous biological diversity of all own indigenous Arcticus Blancus group polar life that includes all biological and botanical organisms in accordance with UN Convention on Biological Biodiversity (1992). The prohibition would cover all indigenous polar species that have been integrated into the European Union farms breeding practices such as chickens, cows, bulls, sheep, horses, rabbits, etc.

In addition, indigenous polar species of cows, bulls, sheep and other animals should not be raised to be slaughtered, but for the dairy, wool, feather, etc. in accordance with the indigenous believes. Arcticus Blancus Indigenous animals should be allowed to be farmed only within the indigenous climate above 62 degrees north and outside of polar indigenous climate above 51 degrees north.

Indigenous polar farmed animal species located below above climate geographical range should be kept as dairy stock or traded to northern farms as the farm keepers increase stock of own climate indigenous breeds. Full list of indigenous polar species of farm animals that would be cover under this petition should be compiled thru study of existing EU farming biodiversity that should be compiled thru existing means of statistics in the European Union market.

With nature respectfully,

Petitioner details:

Citizen of the Republic of Poland
Krzysztof Ireneusz Pawlak
Representing Eugenix P.S.A. company
Mariacka 11/7, Katowice 40-014
