## LOCATION OF INCIDENT

Katowice Silesian Voivodeship Poland

## Factual Summary

I would kindly like to report since the crimes committed by NAZI do not expire that the American Companies made deals with the NAZI to supply various military provisions such as energy and machinery on credit bases with instruction to pay for them with the money collected from the persons they deemed an enemy of German State and developed for the German Nazi movement dedicated USA based false theories that Jews and Poles among other religious, ethnic, national groups are inferior to German national interests and therefore should pay with their own money for all supplies that Germany received from the USA for the purpose of WWII. The predisposition of USA is to create pretenses to sell on credit weapons and make other smaller states kill own neighbors. The companies and persons involved in the supply of German III Reich should be investigated to take correct measures towards USA on the UN and ICC level due to ever present threat that USA is causing due to own problems that fails to acknowledge or has issues with defining it. USA keeps on giving away weapons and later demands money with threat to destroy if not paid back. USA keeps on changing the strategies and victims grow in numbers. Natural climatic ethnic groups of Europe are victims of physical and sexual genocide for 1000+. USA threatens that if EU and other European states do not pay USA Government and its companies for protection USA will allow a complete sexual genocide of all woman and children in Europe, so as Prosecution office sees USA tactics are less humane with every passing decade and war. I ask Court to address this issue and ask UN to place complete ban on all USA weapons. In addition, companies responsible for financing holocaust should be placed in criminal proceedings. My great grandfather was placed in Dachau in Germany. I feel the American regime every day, it has been passed to me epigenetically from my great grandfather for which USA is responsible, but have not been yet charged. The crime in the USA is bigger than Russia and the Justice system is nothing but economy for the stock holders as even the prisons are privately owned corporations.
